

## Bibliography of Albert Henry Banner's Contributions to Science<sup>1</sup>

RICHARD H. TITGEN<sup>2</sup>

**ABSTRACT:** A. H. "Hank" Banner, professor of zoology at the University of Hawaii for more than 30 yr and member of the Editorial Board of *Pacific Science*, was author or coauthor of nearly 100 publications during his life (1914–1985). I have endeavored to record in this bibliography as many of the titles as I have been able to find. Dr. Banner's diverse interests in natural history resulted in a corpus of work dealing not only with his special interest in snapping shrimp (family Alpheidae), but also publications on ciguatera fish poisoning and on the effects of pollution on coral reefs, as well as compilations of animal and plant names from Pacific islands. References are listed chronologically, but the papers of which Dr. Banner was sole author appear first and those of which he was coauthor follow.
